Office Action Summary

Application No.

10/711,946

Applicant(s)

YEISER, JOHN O.

Examiner

Trevor McGraw

Art Unit

3752

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 05 June 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Rejection under 35 USC § 112

Examiner withdraws rejection to claims 1, 11 and 18 held under 35 USC § 112

Second Paragraph in view of Applicant's amendment.

Objection to the Specification

Examiner withdraws objection to the Specification in view of Applicant's amendment on page 11, second paragraph beginning on line 6 that adds the word –to– between the words “adjacent” and “the”.

Objection to the Drawings

Examiner withdraws the objection to the drawings. The drawings were received on 06/05/2006. These drawings are acceptable.

Claim Rejections - 35 USC § 112

Claims 1 and 10 recites the limitation "each segment" in line 12 of claim 1 and line 13 of claim 10. There is insufficient antecedent basis for this limitation in the claim. Examiner suggests making proper reference to the limitation “each segment” in the claims to allow for proper antecedence.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3752

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over D'Ugo (US Patent Publication 2002/0083518) in view of Gellmann (US Patent 3,375,532) and further in view of Marks (US Patent Publication 2004/0118949).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by D'Ugo (US Patent Publication 2002/0083518). In regard to claims 1-6, D'Ugo teaches an improved shower apparatus that can be installed to a pipe (10) in a preexisting shower that consists of a 3-way connector (16) with an inlet (17) and outlets (22,24) where outlet (24) is connected to a showerhead and outlet (22) is connected to a spray bar or substantially cylindrical member (38) having a plurality of holes (40) which allow angular water spray to be directed toward a person bathing in the shower. The cylindrical member (38) is secured to the wall (46) by means of a bracket (44), clip (42), and suction cup (48) arrangement that encompasses the outer diameter of the cylindrical member (38). The 3 way connector (16) further comprises two valves for controlling flow from the source pipe (10) to the inlet of the 3 way connector (17) and the

outlets (22,24) so that water can be controllably directed from the outlet (24) to the showerhead (12) and outlet (22) and the cylindrical member (38).

3. Claims 7-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over D'Ugo (US Patent Publication 2002/0083518). D'Ugo as discussed above teaches a shower system that can be retrofitted into a shower using an existing plumbing where the showerhead can be removed and attached to a 3 way connector (16) having one inlet (17) and two outlets (22,24). One outlet (24) connected to the shower head (12) and one outlet (22) connected to a cylindrical member (38) with a plurality of holes (40). D'Ugo also discloses a height adjustment retainer housing (34) with a tension knob (36) that is fixable connected with a hose (32) that is in fluid communication with the cylindrical member (38). The height adjustment retainer housing (34), and tension knob (36) function to adjust the height and position of the cylindrical member (38) determinate to the shower users preference. However, D'Ugo fails to teach a swivel joint as that of the present invention for varying the height and position in accordance with user preference. It would have been obvious to one of ordinary skill in the art at the time of the present invention to provide swivel joints at various positions in the shower spray bar arrangement affixed to connector pipes in lieu of the D'Ugo hose (32) to allow for a wider range of height and positioning. It is further obvious to one of ordinary skill in the art at the time of the invention to change and allow for other manners of attaching a securing means to the wall of a shower providing for an adhesive substance or a bolting device in lieu of a suction cup as provided for by D'Ugo to further simplify the shower spray bar retrofitting progression. Although D'Ugo teaches a plurality of spray openings

Art Unit: 3752

it fails to teach plurality of spray nozzles that extend from a tubular body and are spaced apart in a single line long the length of the tubular body to emit water in a horizontal stream. Marks (US Publication 2004/0118949) teaches a shower nozzle assembly with segments having a tubular body with a plurality of spray nozzles that extend from an outer surface of the tubular body where the spray nozzles are disposed along the length of the tubular body in a single line so water can be emitted in a horizontal stream towards a user. It would have been obvious to one having ordinary skill in the art at the time of the present invention to change the plurality of spray openings as taught by D'Ugo for the plurality of spray nozzles as taught by Marks to provide for a spraying assembly that allows for more controlled direction for water to be directed towards a user.

Conclusion

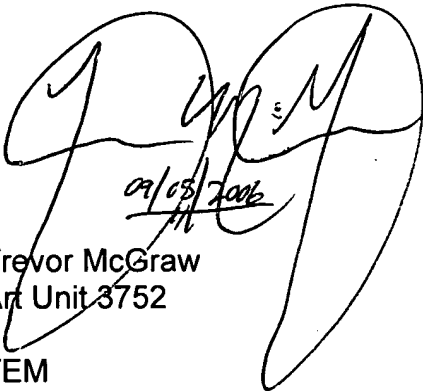

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. D'Ugo (6,567,998), Gellmann (3,375,532), Klose (D341,191), Klose (D340,376), Bowden (4,809,369), Casperson et al. (5,742,961), Perry et al. (6,378,791), Marks (2004/0118949).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trevor McGraw whose telephone number is (571) 272-7375. The examiner can normally be reached on Monday-Friday (2nd & 4th Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on (571) 272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
